

# Fan Grill Extension

**PATENT  
PENDING**

## Save Time & Money On Retrofit Fan Installs

The IM Fan Grill Extension is a thin ABS plastic piece that covers up the gap between the new fan grill and the existing drywall. The one-size-fits-all piece is designed to cover 90% of the rough opening sizes currently in the field and will work with major bath fan brands including Panasonic & Broan.

### Moisture Resistant

The Fan Grill Extension will not rot or degrade when exposed to moisture.

### Paintable

Can be painted to match ceiling color and texture.

### Low Profile

At less than 1/4" thick, the Fan Grill Extension creates an attractive transition between the Fan Grill and surrounding ceiling.
